Our umbrella of brands comprises of solutions in **Infrastructure & Cloud, CAD & Engineering, Wireless Technology, Networking & IT Security and Business Solutions** that add value and save costs for organizations.

We are the leaders in **CAD solutions for Architecture, Engineering and Construction (AEC) sector.**

Our strategic solutions and service standards are designed to achieve a higher level of customer satisfaction with a proven track record of success.

Our dedicated team of Engineering and Sales are never restricted to any particular brand. We prefer working under the directions of our client while providing support and consultation for their unique business needs.

Mission Vision & Values

CAD GULF

OUR MISSION

To procure a value-added technological environment for small-to-medium sized businesses that will spearhead business growth and foster innovative changes

OUR VALUES

We strongly believe in providing quality service and customer retention. A successful customer experience is the heart and soul of all our efforts

OUR VISION

To be the most trusted IT advisor and key partner to our clients that is recognized by our clients for delivering excellence

Our Solutions

CAD GULF

Infrastructure (On-Premise & Cloud)

We simplify multi-cloud networking, inter-operability of brands/technologies. Our team has a 360 degree approach to secure your apps, data, and users by providing custom techonologies, processes and best practices.

Networking & Cybersecurity

We simplify your security without impacting network performance and protect your data assets whilst counteracting the ever-changing threat landscape enabling to scale for continued business growth.

Wireless Solutions

Our team of experts will help you transition to advanced wireless solutions by enhancing your network's performance with improved reliability, security and resiliency.

CAD & Engineering

We offer our customers with end-to-end engineering design support softwares available for Architectural, Engineering & Construction (AEC) and Media & Entertainment solutions.

Business Communications

Our solutions give you the platform to empower your employees with faster, always-on continuous collaboration and it helps you power your digital future.

End User Technology

We offer our clients with capabilities that focus on enabling companies to achieve their business objectives through effective management and empowerment of their end user comput-ing resources.

Our Services

IT Consulting Service

We help our clients to develop and execute a clear and strategic IT roadmap with priorities that are closely linked to business goals by understanding their goals, business processes, and current information systems capabilities.

Managed IT Service

We are a managed services provider (MSP) responsible for managing customer IT infrastructure. Depending on your goals and budget, we can be a part of your in-house IT team or a full-fledged IT department with a fully customized plan based on your needs.

Cloud Service

We eliminate capital expenditure needs of buying hardware / software and running on-site datacenters—the racks of servers and storage, the round-the-clock need for power and cooling, and the IT experts for managing the on-premise infrastructures

SLA (Annual Maintanence Service)

We offer our customers customized Service Level Agreements (SLA) support packages based on their unique needs, thereby supporting them to reduce IT costs by 50%, have a more secure IT infrastructure and minimize business downtime caused by IT issues.

End User Technology Service

Our team evaluates and aligns your computing environment with industry best practices and provides an excellent technical approach to leveraging Digital Enterprise Management capabilities to deliver a consistently superior end user experience.
